

Production Employee Onboarding Kit

Production Department

By: Lian Harper and Craig Carswell

This onboarding kit gives new production employees a high-level overview of their role, required documents, weekly expectations, tool requirements, pay progression, confidentiality expectations, and where to find important company resources.

1. What This Kit Includes

- Employment contract package
- Weekly production expectations
- Standard production tool kit overview
- Pay scale and progression framework
- Non-Disclosure Agreement (NDA) summary
- Locations of company forms, SOPs, and shared resources
- Employee acknowledgement and onboarding checklist

2. Welcome to the Production Department

The Production Department is responsible for building, testing, improving, and preparing TCG Machines equipment and related sub-assemblies for customer use. New employees are expected to learn our standards for quality, organization, communication, safety, and continuous improvement. Our core production areas include chassis, conveyor, scanner, final assembly, pre-test, testing support, refurbishment, and inventory-related support work.

3. Employment Contract Package

Each new employee should receive and review an employment contract before starting work. The contract package should include:

- Employee name, position title, department, and start date
- Employment type: full-time, part-time, temporary, or probationary
- Standard working hours and work location
- Reporting structure and direct supervisor / team lead
- Probation period details, where applicable
- Compensation terms and payroll schedule
- General duties and expectations
- Reference to company policies, confidentiality, and conduct expectations

Typical role summary: Production employees may assist with sub-assemblies, module builds, quality checks, workstation upkeep, basic testing support, and identifying shortages or process blockers.

4. Weekly Production Expectations

Area	Weekly Expectation
Attendance	Arrive on time, be ready to work at the start of shift, and communicate attendance issues early.
Daily Assigned Work	Follow assigned priorities and complete builds according to SOPs and team lead direction.
Quality	Build carefully, verify work, and avoid passing defects forward.
Communication	Report missing parts, tool issues, unclear instructions, or blockers quickly.
Training	Continue progressing through assigned stations, guides, and training checklists.
Organization	Maintain workstation cleanliness and follow 5S standards.
Inventory Awareness	Return tools, parts, and hardware to their labeled locations.
Meetings	Attend production check-ins, weekly updates, and role-specific training when requested.
Daily Close-Out	Clean the station, label incomplete work, and update the lead on progress or issues.

Daily close-out checklist:

- Clean the workstation and remove clutter
- Return all shared tools and hardware to the correct location
- Put unused parts back into the correct bins or shelves
- Clearly identify incomplete work or issues needing follow-up
- Communicate shortages, damage, or blockers to the team lead

5. Standard Production Tool Kit

Each employee should be assigned the tools required for their workstation and training area. A standard tool kit may include:

Tool / Item	Tool / Item
Allen key set	Phillips and flathead screwdrivers

Precision screwdriver set	Nut drivers
Pliers and flush cutters	Tweezers or small-part handling tools
Measuring tape or ruler	Calipers (as required)
Torque tools (as required)	Threadlocker and approved assembly consumables
Safety glasses and required PPE	Cleaning cloths / workstation cleaning supplies

Station	Typical Tool Focus
Chassis	General assembly tools, alignment tools, fastener bins, repair tools
Conveyor	Pulley / belt tools, tensioning tools, shaft-related tools
Scanner	Precision tools, small hardware tools, drivetrain tools
Inventory / Parts	Labeling tools, scanners, bins, shelf references
Testing	Test cables, checklists, computer access, and testing equipment

6. Pay Scale and Progression

The production pay structure should reflect skill growth, quality, reliability, and ability to work independently. Actual wage amounts should be inserted by leadership or HR.

Level	Title	General Description
1	Production Trainee	Learning safety, tools, parts, and basic work instructions.
2	Production Assistant	Can complete simple assigned work with support.
3	Production Builder	Can complete assigned sub-assemblies independently using SOPs.
4	Module Builder	Proficient in one major area such as chassis, conveyor, or scanner.
5	Senior Production Builder	Can work across multiple areas and assist with training.
6	Production Lead Support	Supports scheduling, coordination, shortages, and workflow management.
7	Master Phyzbach Builder	Can build across all major areas, support testing, troubleshoot, and train others.

Progression should consider: attendance, quality, independence, communication, cross-training, training others, and overall contribution to team goals.

7. NDA and Confidentiality

All production employees should sign a Non-Disclosure Agreement before being given access to internal systems, machine details, customer equipment, production methods, or company documents.

Confidential information may include:

- Machine designs, components, and internal production methods
- Testing procedures, technical files, and configuration information
- Customer information and service details
- Internal schedules, pricing, targets, and planning documents
- SOPs, training guides, build instructions, and internal checklists

- Production systems or files such as Teams folders, MRPeasy, Odoo, AutoFarm Server processes, and related production data

Employee confidentiality expectations:

- Do not share internal information outside the company
- Do not take or post photos / videos of machines, documents, or work areas unless approved
- Do not remove files, documents, or company property without permission
- Continue protecting confidential information during and after employment

Employee Signature: _____ Date: _____

Company Representative: _____ Date: _____

8. Company Forms and Information Locations

New employees should be shown where to find the forms and resources they need during training and day-to-day work.

Item / Information	Typical Location
Production guides and SOPs	Shared production folders / Teams
Training checklists / TCG University materials	Training folder or assigned team lead resources
Build schedules and planning documents	Production planning folder / shared team location
Part shortage tracking	MRPeasy, Odoo, Teams, or assigned production tracker
Service orders	MRPeasy or the company ERP system
3D print / AutoFarm update files	Production Development → 3DP Configs → Part GCode process
HR / admin forms	Admin or shared forms folder
Inventory locations	Labeled shelves, sub-assembly shelves, and rolling racks

9. Communication and Safety Expectations

Employees should communicate:

- Missing or damaged parts
- Missing or damaged tools
- Quality concerns
- Unclear instructions
- Completed and incomplete work
- Training needs
- Schedule blockers
- Safety concerns

Common communication channels: Microsoft Teams, direct supervisor communication, production meetings, MRPeasy, Odoo, checklists, and station boards.

Basic safety expectations:

- Use tools properly and wear required PPE
- Report unsafe conditions immediately
- Keep workstations organized and free of trip hazards
- Do not operate equipment without training
- Ask for help when moving heavy or awkward items

10. First-Week Onboarding Checklist

Task	Complete
Employment contract reviewed and signed	■
NDA reviewed and signed	■
Safety expectations reviewed	■

Workstation and tool kit assigned	■
Shown where SOPs, forms, and schedules are located	■
Introduced to reporting structure and communication channels	■
Assigned first training area / station	■
Daily close-out expectations reviewed	■

11. Employee Acknowledgement

By signing below, the employee confirms that they have received and reviewed this Production Employee Onboarding Kit and understand the expectations described within it.

Employee Name: _____

Employee Signature: _____

Date: _____

Supervisor / Trainer: _____

Supervisor Signature: _____

Date: _____
